## My job

I work for Devon Information, Advice and Support (DIAS) as a Casework Officer.

I listen and advise parents and children and young people who may need some help with something that is going on at school or college or linked to education. I can also help you know your rights and the law.

I go to school meetings and support parents and/or children and young people. This can help them feel more confident in getting across what it is they want to say.

### **What you should know about me**

I think it is really important for all the children and young people we support to feel they are listened to. I want to help everybody I support to be able to share how they feel about their education and their future, and feel confident to suggest changes that will make things work better.

I don't mind travelling anywhere in Devon to come and meet you.
